

Short-term Request for Proposals

1. Project title

- Identification of dust laden roads.

2. Overview

- Delhi is one of the most polluted city in India. Studies have shown apart from paddy burning, industrial emissions, vehicular emissions, dust is one of the major contributor in air pollution. In compliance to the NHRC direction, it has been decided that , a third party survey of road to identify unpaved roads, roads with unpaved shoulders, road and un-greened central verges, be completed within 15th December 2022 in Delhi.

3. Scope of work

- To identify and enlist unpaved roads with name of the road, name of the agency, with approximate length.
- To identify and enlist road with unpaved shoulders with name of the road, name of the agency, with approximate length.
- To identify and enlist roads with un-greened central verges with name of the road, name of the agency, with approximate length.

4. Proposal

- The proposal shall contain the methodology to achieve the scope of work and the budgetary requirement. The methodology may include field surveys, remote sensing, satellite image, etc.

5. Timeline

- Completion of survey work 15th February 2023.
- Submission of report 28th February 2023.
